Duchy Blends

Duchy Super Beef

- K05001BG

- 16% Protein
- Excellent very high specification for all beef and rearing situations except barley beef
- Mineralised
- Suited to most forage based diets
- Versatile beef/rearing blend

Feeding guide

- Feed from 12 weeks of age

Compounds

BOCM PAULS Prime Mix 34 Pellets - P00727BG

(replaces Pinnacle Beef Concentrate)

- 34% Protein
- Balanced cereal based systems
- High energy to promote rapid growth rates and complement cereals

Feeding Guide

- For balancing with cereals in an ad lib production system

BOCM PAULS Top Grade Rolls - P00633BG

- 13% Protein
- Specialised finishing ration at grass
- High starch levels to ensure fast efficient growth
- In roll form to eliminate the need for troughs

BOCM PAULS Suckler Cow Rolls - P00670BG

BOCM PAULS Pre-Calving Rolls - P00034BG

- 20% Protein
- Formulated for pre-calving

Buckets & Minerals

Crystalyx Pre-Calver - 76785 / 76786

Helps replenish trace elements and vitamin reserves pre calving. Helps support and maintain a strong healthy immune system. Helps condition cows during the dry period to maintain optimum health. Helps maintain optimum blood magnesium levels to reduce the risk of milk fever and “slow calvings” Optimises calf health and vigour. Maximises dry matter appetite and forage intakes post calving to help maintain energy balance for optimum health, fertility and lactation performance.

Crystalyx Cattle Booster - 75914 / 75419

Ideal product to supplement and balance forages all year round for growing cattle and breeding bulls. Stimulates intake and digestion of forage to improve animal performance.

How to feed duchy buckets

- Place buckets away from drinking water initially to control intake
- Site over whole grazing area and feed to appetite
- Ensure ad lib forage/grazing is available at all times
- Move the feeding position regularly to avoid poaching when fed outside
- Ensure enough buckets are offered to stock to prevent bullying.

Intake Guide

Dairy / Beef	100—175g/day or 1 bucket per 20 head/week
Young Cattle	100—155g/day or 1 bucket per 25 head/week
Calves	50—100g/day or 1 bucket per 30 head/week

Duchy Cattle Plus - G142 (replaces SUPAlYx Hi Phos)

Use for all classes of cattle throughout the season for an extra nutritional boost. Contains protected copper and zinc for optimum availability to the animal.

Duchy Cattle - **G141** (replaces SUPAlyx Cattle GP)

Correct levels of all major minerals, trace elements and vitamins for all types of cattle. Use at grass and with forages to correct mineral deficiencies and provide a boost.

Duchy Mag - **G144** (replaces SUPAlyx Cattle SupaMag)

Use as an aid to prevent grass staggers during periods of stress or lush grass growth. Contains 15% magnesium combined with sodium for better availability.

Suitable for dual grazing with sheep

Duchy Cattle Mag - **G143** (replaces SUPAlyx Cattle SupaMag)

With all the benefits of Mag with added copper. Feed to dairy, beef and suckler cows to help prevent grass staggers and improve fertility and feed utilisation.

Duchy Hoof Plus - **G148**

Specialist formulation designed to improve the development and repair of hoof tissue and reduce lameness. With protected zinc and Biotin (Vitamin H) to promote the growth of healthy hoof tissue and hardness and proved a better barrier against infection.

Feed to cattle and sheep at any time of year.
