

Product: **Premium Coal**
 Size: **25kg**
 Code: **9211**
 Description: Good quality coal, quite large in size, mainly used in open fires.
NOT Smokeless. Not recommended for enclosed boilers.

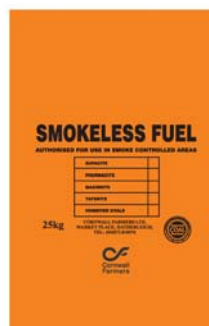

Product: **Economy Coal**
 Size: **25kg**
 Code: **9212**
 Description: Similar burning quality to Premium coal but much smaller in size.
NOT Smokeless. Not recommended for enclosed boilers.

Product: **Anthracite**
 Size: **25kg**
 Code: **Large - 9214 Small - 9215**
 Description: Similar in appearance to superglo but is a higher quality anthracite with a greater heat output. Smokeless and available in small and large nuts. Suitable for rayburns, Parkrays, Agas, Wood Burners etc. **Must NOT be used in open fires.**

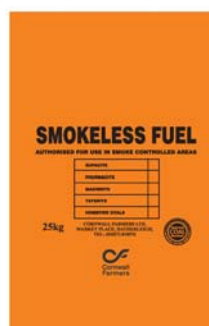

Product: **Supacite**
 Size: **25kg**
 Code: **15467**
 Description: This product is manufactured 'ovoids' consisting of compressed anthracite dust. Smokeless fuel suitable for enclosed appliances (Rayburns, Parkrays, etc).

Product: **Superglo / Redflame**
 Size: **25kg**
 Code: **13093**
 Description: Imported anthracite – often referred to as 'boiler nuts'. Looks like small coal but is smokeless. Mainly used in Rayburns and Wood burners. **Must NOT** be used in open fires.
 A popular 'economy' anthracite.

Product: **Phurnacite**
 Size: **25kg**
 Code: **9213**
 Description: This product is manufactured 'ovoids' consisting of compressed anthracite dust. Smokeless fuel suitable for enclosed appliances (Rayburns, Parkrays, etc).

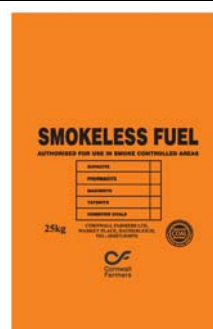

Product: **Newflame**
 Size: **25kg**
 Code: **23847**
 Description: A medium sized 'pillow' shaped smokeless ovoid for use in enclosed appliances and open fires. It has taken the brand name 'Coalite' but looks nothing like the original coalite 'coke' product.

Product: **Maxibrite**
 Size: **25kg**
 Code: **23866**
 Description: This product is manufactured 'ovoids' consisting of compressed anthracite dust. Smokeless fuels suitable for enclosed appliances (Rayburns, Parkrays, etc).

Product: **Homefire Ovals**
 Size: **25kg**
