

The Gunmakers' Choice

Since 1947 Hull Cartridge have enjoyed the enviable reputation for manufacturing some of the best and most consistent shotgun cartridges in the world.

Their research and development technicians always strive to exceed customer expectations in a world that's constantly changing its requirements.

Hull incorporate the latest technological advances to maximise the performance of every cartridge in their range. This means that each cartridge must undergo extensive field tests, in process checks and quality control procedures including computerised ballistic analysis which details every aspect of a cartridge's performance. Muzzle velocity, peak pressure, ignition time, range velocity, pattern consistency and time down the barrel are all stringently monitored to ensure an unprecedented level of excellence and consistency.

Hull Cartridge is not the only gunmakers' choice but the choice of discerning game shooters worldwide.

Gun Check & Service

Check your gun and cartridges compatibility before buying. If in doubt ask your local gunsmith or telephone the cartridge manufacturer.

Have your gun serviced regularly and clean after every use.
